

A colleague has brought the following typographical error in our paper

Lukas D, Bradley BJ, Nsubuga AM, Doran-Sheehy D, Robbins M,
Vigilant L

Major histocompatibility complex and microsatellite variation in two
populations of wild gorillas.

Molecular Ecology 13: 3389-3402. (2004)

to our attention.

In figure 3 (A) the allele at the DRB5 locus of the first haplotype for
western gorilla is labelled as

1*0309 3*0101 5*0501 ?6*0204

but should read

1*0309 3*0101 5*0101 ?6*0204

We apologize if this has caused any confusion.
