

The Evolution of Brain Connectivity Project at the Max Planck Institute for Evolutionary Anthropology seeks applicants for a position as

Student Research Assistant (min. 40 h/month)

You will work in an international team of researchers and code audio and video data collected on behavior, vocalizations and cognition of great apes and monkeys living in European Zoos and African Sanctuaries and you will make an important contribution to a larger project that examines behavior and brain connectivity in hominoids.

Criteria for applicants:

- enrolled at a German University (Bachelor, Masters, or equivalent)
- reliable and ready to provide a high level of commitment
- sustained attention to detail during repetitive tasks
- willingness to work independently and able to work as part of a small team
- able to report back on work progress and communicate effectively

What we offer:

- first-hand experience in world-class research institution
- flexible work hours
- payment according to currently pursued university degree

How to apply:

Please submit your application electronically until 30 September 2020 to

Cathy Crockford: crockfor@eva.mpg.de

Roman Wittig wittig@eva.mpg.de

The Max Planck Society is committed to equal opportunities and to employing individuals with disabilities and explicitly encourages them to apply.

We look forward to receiving your completed application.
