

Semantic Maps: Methods and Applications

Methods & Approaches

08.30	Quantifying semantic regularity across languages	Asifa Majid & Stephen C. Levinson
09.00	Semantic map geometry: two approaches	Joost Zwarts
09.30	Polysemous Qualities and Universal Networks	Loïc-Michel Perrin
10.00	Semantic maps and implicational universals in diachronic studies: the case of reflexives	Nicoletta Puddu

10.30 Break

Applications: Verbs & Sundry Topics

11.00	How variation in sampling changes semantic maps built on a comparison of parallel text data in the domain of motion events (verb stems and case/adpositions)	Bernhard Wälchli
11.30	What do "do" verbs do? Towards a typology of generalised action verbs	Eva Schultze-Berndt
12.00	Analytical dimensions and the functional map of Parts-of-Speech	Kees Hengeveld & Eva van Lier
12.30	Modality's semantic map revisited	Johan van der Auwera, Petar Kehayov & Alice Vittrant

13.00 Lunch

Applications: Epistemicity & Multi-clause Structures

14.00	A semantic map of epistemic expressions	Kasper Boye
14.30	A semantic map for epistemic and inferential functions	Liisa Vilkki
15.00	Semantic maps for complementation strategies	Dmitry Gerasimov
15.30	The twofold conceptual space of coordination relations	Caterina Mauri

16.00 Break

Diachrony & Interpretation

16.30	Grammaticalisation and Semantic Maps	Luc Steels & Remi van Trijp
17.00	Diachronic issues in a map of case functions	Heiko Narrog
17.30	How "semantic" are semantic maps? A pilot study of passive and impersonal constructions in European languages	Andrea Sanso
18.00	Semantic maps, conceptual spaces, and mental representation	Sonia Cristofaro

Alternates

The big and the little: on the difference between domains and functions in creating semantic maps	Ferdinand de Haan
Mapping the semantics of pronominal clitics in Iranian	Geoffrey Haig
Semantic maps and word formation: Agents, Instruments and related semantic functions	Eugenio R. Lujań
Semantic maps without semantics	Ekkehard König
